

# Q PALLET DISPENSER

## “GREEN” TECHNOLOGY ALL ELECTRIC

- **Functional and up-to-date design**
- **Logical touch-panel operation**
- **Total flexibility in use**

**Unlike most other types of dispensers the Q pallet dispenser doesn't require compressed air, only a 230 W power supply.**

Therefore, you can place it where ever you want - the only requirement is a power point nearby.

The pallet dispenser automatically stacks or destacks one pallet at a time. One push on the control panel to shift from stacking to destacking mode. Also, it is possible to load or unload a whole stack of pallets at once.

- With a very user-friendly control panel.
- Reliable and accessible mechanics that require very little maintenance.

- With photo cells at the bottom.
- The dispenser is primarily designed for EURO pallets but can also be supplied for other types.
- The dispenser is available as a stand-alone unit and as an in-line unit for integration in a conveyor system

Capacity	: 17 pallets/max. 500 kg
Power	: 230 V
Power consumption	: Max. 500 W
Colours	: Blue/ anthracite
Dimension	: L=1.707 x B=1.370 mm H=2.530 mm
